Reasons For Allowance

Claims 41 – 82 are allowable.

1. The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims the prior arts made of record fail to suggest a high-performance apparatus for data conversion and method comprising a processing unit couple to a conversion unit and operative to process a digital frequency domain information extracted from an input signal and based on the processed frequency domain information, operative to provide in combination with the conversion unit at least two processed signals. In combination with other limitations of the claims the prior arts made of record fail to suggest a high-resolution, high-speed apparatus for data conversion in which the apparatus has a high resolution that either an ADC¹ and wherein a data conversion is performed in the frequency domain spectral tools, thereby providing an improved dynamic range and quantization noise, a reduction or elimination of critical analog circuit requirements and bottlenecks and an increase of the sampling rate relative to existing pipeline/subranging architectures. Moreover, in combination with other limitations of the claims the prior arts made of record fail to suggest a method for implementing a high performance data converter comprising a processing time domain input signal into a frequency domain signal in a digital form using at least two data converters having each at least one lower performance than the other high-performance converter in order to obtain at least two processed signals.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
